## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 15 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 3-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Wiekhorst et al. (2004/0055779).

Wiekhorst et al. discloses (Figure 6) a cable comprising a cylindrical core comprising at least one twisted pair of insulated wires, and a jacket surrounding the core, the jacket comprising at least one spline projecting inward from an inner surface of the jacket, wherein at least a portion of the twisted pair is positioned between the spline and a center of the core (re claim 1). The feature of preventing relative movement of the jacket with respect to the core is inherent from the structure of Wiekhorst et al. Wiekhorst et al. also discloses the at least one spline comprising a plurality of splines projecting inward from the inner surface of the jacket (re claim 3), the spline being continuously extending on the inner surface of the jacket (re claim 4), the spline extending along a longitudinal axis of the core (re claim 5), the at least one spline comprising at least two splines projecting inward from the inner surface of the jacket, the splines equally spaced from one another (re claim 7), the at least one spline comprising four splines projecting inward from the inner surface of the jacket (re claim 8), and the splines projecting

radially inwardly from the inner surface of the jacket (re claim 9). Re claim 6, it has been held that the patentability of a product claim is determined by the novelty and nonobviousness of the claimed product itself without consideration of the process, extruded, for making it which is recited in the claim. In re Thorpe, 227 USPQ 964.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 2 and 10-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiekhorst et al. in view of Koyasu et al. (2003/0205402).

Wiekhorst et al. discloses the invention substantially as claimed except for a central core filler which is round. Koyasu et al. discloses a cable comprising a central core filler which is round. It would have been obvious to one skilled in the art to provide the central core filler

taught by Koyasu et al. in the cable of Wiekhorst et al. to further secure the positions of the twisted pairs within the cable.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1, 10 and 19 have been considered but are moot in view of the new ground(s) of rejection.

### ***Communication***
